"Tires & Wheels" Information Pamphlets

The tires and wheels of a motorcycle are the primary safety link between your customer and the road. They can give top performance only if they are maintained correctly. Additionally, tires are a significant cost in the ownership of a motorcycle, so paying attention now to the basics of tire and wheel care may keep your customer from paying later for premature repairs or replacements.

The attached pamphlets contain information on the following areas:

- Tire Pressure
- Tire Tread
- Valve Stem Care
- Wheel Bearings
- Wheel Rims
- Wheel Balance
- Tire Puncture Repairs
- Is a Bigger Tire Better?
- BMW Motorcycle Tire Chart (1985 and later models)

"Tire & Wheels" is available free-of-charge (in packages of 50) from your Technical Services Manager under part number MCS-047.

We encourage you to make all service pamphlets available to your customers in your Service Reception Area. They can serve as valuable references when discussing your customers' service needs.

Very truly yours,

BMW of North America, Inc.

Frank Stevens
