BMW Motorcycles

Service Bulletin

Subject: Recall Status Report

Topic: The following information will serve as a reference and indicator of the various BMW motorcycle recall campaigns that are still open and active in the US.

Your center should take every opportunity to check each BMW motorcycle that passes through your workshop and/or showroom to determine if there are any recalls or service actions that remain open for that particular VIN. In no case should a motorcycle leave the workshop or the showroom as either a new or used retail sale, with unsatisfied recalls and/or service actions.

Note: %: Completion percentage as of the end of August, 2000

Recall No.	Defect Code	Description / SI #	Year / Model	%
84V-092	00 00 36 08 00	Cast front wheel SI#: 36 023 84 (2123)	1977-1982 Boxers	77
