## Fork Oil Capacities - All Models - REVISED 10/92

**Information:** Due to changes in front fork suppliers and sports suspension package on some models, we felt the need to show technicians how to determine the fork manufacturer and fork oil capacities.

It is important that all technicians be able to identify the suspension type to insure correct refill requirements.

**Sport Suspension:** Models which have sports suspension will have a "S" stamped into the fork cap.

**Showa Fork:** Starting with 1992, all K75, K75S, K75RT and R100R models have showa front forks.

**Note:** Some early production 1992 models, K75, K75S and K75RT's did not have showa forks.

Best regards,

BMW of North America, Inc.
