Circular-Letter of the Service Department
Motorcycle: General Group No. 4/52

Dear Sirs,

Subject: Magnetic drain plugs for R 24, R 25, R 51, R 67 and R 68

We have developed drain plugs with a permanent magneto which can be fitted easily on all motorcycle models, in replacement of the present drain plugs (crankcase sump, gear box and rear wheel drive housing).

We have already installed these new magnetic drain plugs on the sports model R 68 and have ascertained that particularly during the running-in period chips produced by the abrasive action of the moving parts are retained, so that in the future these chips will no longer be circulated by the lubricant and can be removed at the next oil change.

The magnetic drain plugs, spare part No. 268 1 01 630 04, are available through our Spare Parts Department

at the price of DM 3.50, a piece.

Yours truly,

BAYERISCHE MOTOREN WERKE
